

# Lab Report

## 1. Tftpd 64 Directory

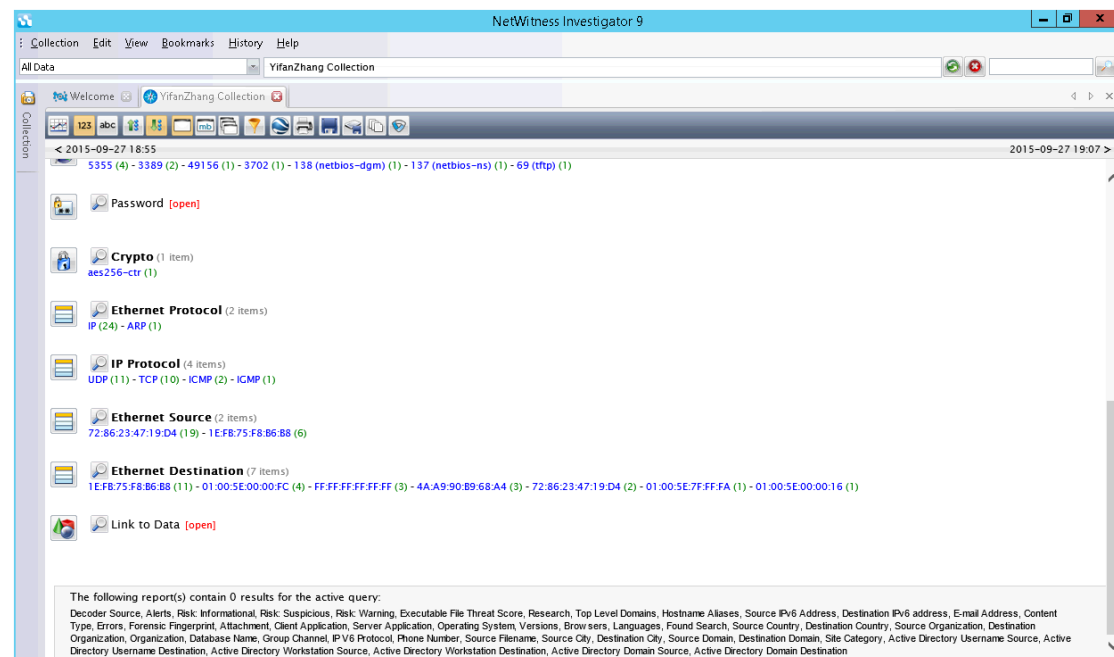

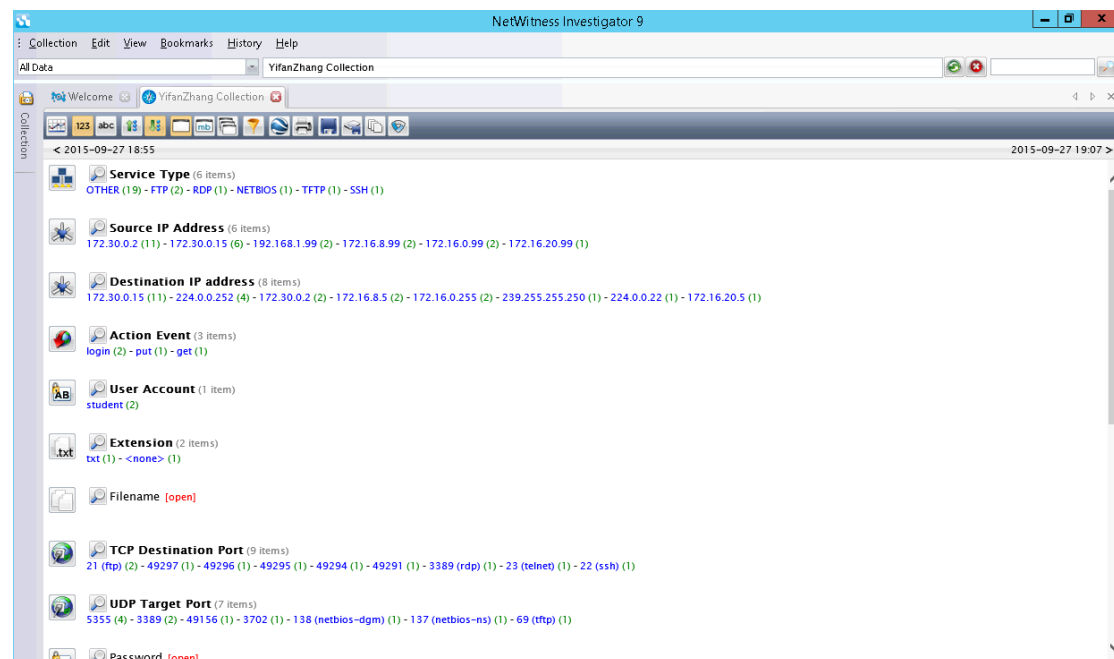

### Explanation:

In this step, we use the following command to transfer a file to Tftpd64 client.

**ftp 172.30.0.2 put c:\\users\\administrator\\desktop\\YifanZhang\_TFTP.txt**

## 2. NetWitness Investigator summary

### Explanation:

This above two pictures shows that the categorized information from previous Wireshark dump file. We can see there are numerous information such as clear text password, protocols, source destination IP, action events, account, the way to encrypt communication and how many services are involved in the packets capture file ...etc.
